HEATPRESS FOR THERMAL TRANSFERS

Maizey's heat presses are engineered to permanently imprint designs or graphics produced on heat transfer materials on fabric substrates with the application of heat and pressure. Our heat presses provide adjustable pressure settings, uniform heat distribution across the surface of the heating plate and accurate timing controls, ensuring perfect application.

MODEL SY380 HEAT PRESS

FEATURES:

- Ideal for low to medium transfer settings.
- Microprocessor controls for time and temperature accuracy.
- Press/work area of 380 x 380mm
- Teflon coated heat plate with temperature range: Up to 299°C
- Weight: 25kg

Maizey Plastics also supply Poli-Tape heat transfer films in both digital printable and cut films.
