

LARGE FORMAT DIGITAL PRINT MEDIA AND LAMINATES

RTAPE VINYLEFX®

RTape Vinylefx® Decorative Series is a cut above other special effects films thanks to a proprietary deep-embossing technology that provides a crisper three-dimensional appearance to each pattern. Because the Vinylefx® Decorative Series is vinyl, not polyester, this require no top coating prior to printing!

These products print, cut, weed and handle just like intermediate vinyl and is exceptionally suited for general purpose signage applications!

The distinctive look of these eye-catching films adds value to your designs, so signs will command higher selling prices and profits! Vinylefx® colors are solid through the vinyl — NOT laminated or top coated.

Unlike cold-embossed polyesters, our fade-resistant films are hot-embossed, which produces deeper, better defined patterns.
